Hi Ron,

Sorry, the briefing paper wasn't clear.

Clarksburg had submitted a sample site plan in 2019 and reported to WVDHHR with that plan that they had no lead service lines. So all LCR compliance sampling was done at homes with lead solder on copper pipe. WVDHHR confirmed that Clarksburg has not had an AL exceedance for lead or copper.

<b>Ex. 5 Deliberative Process (DP)</b>
--

<b>Ex. 5 Deliberative Process (DP)</b>	The order issued this morning requires a new materials inventory, identifying any known LSLs. It also requires them to go back to full monitoring and complete a full round of monitoring by the end of this August at sites with LSLs that they find. It also requires WQP monitoring to occur very quickly.
--	---

<b>Ex. 5 Deliberative Process (DP)</b>
--

<b>Ex. 5 Deliberative Process (DP)</b>
--

WVDHHR has also notified the 12 consecutive systems that purchase water from Clarksburg that they have to go back to full LCR monitoring and that they have to complete that monitoring by July 30, 2021. None of the consecutive systems have exceeded the lead AL in the past, either.

Let us know if you have any other questions.

Rick

Hi Rick and Karrie,

I hope all is well at the home of the Liberty Bell on the upcoming July 4<sup>th</sup> weekend. Thank you for the paper on Clarksburg.

Ex. 5 Deliberative Process (DP)

## Ex. 5 Deliberative Process (DP)

I see in SDWIS that Clarksburg is on triennial monitoring. So they take samples at 30 homes? Based on our SDWIS pull, it looks like the system has never had a reported exceedance of the AL. Do you have the same information?

Thank you for looking at this on a Friday before a long weekend.

Ron

Hi, Jennifer.

This is in follow up to our conversation a little while ago. If there are questions or suggestions, please let us know. Best bet for the more detailed questions is to include me, Karrie Crumlish and Rick Rogers (ECAD). Karrie and Rick are coordinating closely internally as well as with WVDHHR on this issue.

Thanks,  
Cathy
